Newmark
125 Park Avenue
New York, New York 10017

Dear Newmark Hiring Team,

My name is Richard Alvarez, and I am excited to apply for the IT Internship position at Newmark. With a background in web development, computational research, and filmmaking, I bring a unique perspective to technology projects that bridge creative and technical solutions. Newmark's emphasis on impactful projects and collaboration resonates deeply with my aspirations to leverage technology to deliver innovative results in the Commercial Real Estate (CRE) industry.

At Kenyon College, I pursued a Bachelor's degree in Film, with a concentration in Digital Humanities and a minor in History. My academic journey included coursework such as *Data Structures and Program Design*, *AI for the Humanities*, and *Software Development*, which built a foundation in programming and data analysis. I applied these skills to interdisciplinary projects, such as creating a Retrieval-Augmented Film Recommendation System that utilized Node.js, Python, and APIs to enhance metadata and user experiences.

In addition to my technical background, I bring professional experience in IT and technology-driven environments. As an IT Assistant at Kenyon College's Library and Information Services, I supported campus-wide technical operations by managing workstations, assisting users, and optimizing workflows with automation tools. My technical projects include designing dynamic web applications using React and Next.js, integrating APIs, and building responsive user interfaces with Tailwind CSS. These experiences have sharpened my ability to adapt to diverse challenges, collaborate with teams, and contribute creative solutions to complex problems.

I am particularly interested in contributing to your Web Development or Product Development teams. With my skills in Python, JavaScript, SQL, and my experience with frameworks like React, I am confident in my ability to support the development and implementation of impactful technology projects. Additionally, my analytical approach and collaborative mindset make me well-suited to brainstorming innovative solutions and staying up-to-date with emerging technologies.

This internship represents an exciting opportunity to apply my skills to real-world challenges while learning from experienced professionals in the industry. I look forward to the chance to contribute to Newmark's mission and grow alongside your talented team.

Thank you for considering my application. I would be delighted to discuss how my experiences align with the IT Internship role. I look forward to the opportunity to contribute to your team's success.

Sincerely,
Richard Alvarez
