Hiring Manager
Mid-America Real Estate Group
Oakbrook Terrace, IL

Dear Hiring Manager,

I am writing to apply for the Service Desk Technician I position based in Oakbrook Terrace. I recently completed my B.A. in Film at Kenyon College with a minor in History and a concentration in Digital Humanities, and I will begin a Master's in Computer Engineering at NYU Tandon this fall. I bring one year of hands-on IT support experience and strong skills in communication, troubleshooting, and team-based problem solving.

While at Kenyon, I worked as an IT Assistant with the Library and Information Services team. I set up workstations, recycled sensitive hardware, and restocked printer supplies daily. I also used my programming skills to automate a scheduling task by compiling class times and room availability into a single reference sheet, improving our team's efficiency.

Outside of formal roles, I've managed my own video and research projects using Microsoft 365, Python, and version control tools. These projects involved high-pressure deadlines, where I ensured systems ran smoothly and team communication stayed clear. I take documentation seriously and have experience managing technical issues through versioned repositories and structured notes.

I'm excited about a full-time, in-person role that prioritizes direct user support and continuous learning. I'm eager to bring strong service skills and a fast learning curve to your technical support team. Thank you for considering my application.

Sincerely,

Richard A. Alvarez
