Hiring Manager
Securitas Technology Corporation

Dear Hiring Manager,

I'm writing to express my interest in the Security Systems Technician role at Securitas Technology. I recently earned a B.A. in Film and Digital Humanities from Kenyon College, where I built skills in both IT systems and technical problem-solving—experiences that align closely with your requirements.

My role as an IT Assistant at Kenyon College gave me hands-on experience imaging and deploying Windows devices, diagnosing AV systems, and managing user accounts. I tracked maintenance tasks through custom spreadsheets and became comfortable working independently under time constraints. Before that, I worked in residential construction, supporting general contractors with demolition and basic electrical work. These roles taught me how to handle tools and troubleshoot low-voltage systems in the field.

I hold a CompTIA ITF+ certification and am actively working toward my A+. I'm proficient in Microsoft Office, ticketing systems like ServiceNow, and have a solid understanding of IP addressing and networked devices. My experience spans classroom tech, security configurations, and collaborative service roles.

I'm eager to join a team that values precision and reliability. Securitas Technology's reputation for excellence in security solutions motivates me to contribute meaningfully to your mission of protecting people and property.

Thank you for your time and consideration.

Sincerely,
Richard Álvarez
